464	Disposable	Antimicrobial Incise Drape	To help prevent surgical site infection, it is critical to reduce and restrict microorganisms from entering the open surgical wound. Ioban 2 antimicrobial incise drapes provide a sterile surface to the wound edge and continuous antimicrobial activity throughout the procedure. Ioban 2 film helps reduce the risk of surgical site contamination due to skin flora by providing a physical barrier to skin bacteria. The film adheres securely to wound edges which is critical in maintaining the barrier to skin flora.
